

**Driving toward
a more sustainable
future**

Here's our roadmap for bringing our customers solutions that are innovative, require fewer resources and still never sacrifice on performance. For some companies, sustainability is a box that needs to be checked. At Liquibox, we've always seen sustainability as more than just a responsibility. We see it as an opportunity to stay ahead of tomorrow's packaging needs and challenges. To deliver more sustainable performance, our journey begins by focusing on three areas — **products, operations and people.**

Products

designed for the planet. Our strategy to reduce our carbon footprint includes:

Lightweighting
and downgauging

Designing for
recycling and
recovery

Using
eco-friendly
materials

Operations

with less impact. As a global company operating in five continents, we're implementing programs to:

Reduce energy
and water
consumption

Reduce waste
to landfill

Reduce
greenhouse
gas emissions

People

actively collaborating and engaging in the community. We believe it's our corporate and social responsibility to:

Build community
engagement

Advance sustainable
packaging

A high-speed photograph of water being poured into a pool of water, creating a large splash and many bubbles. The background is a solid light blue color.

We're doing all of this to make meaningful change happen.

We look forward to sharing
our ambitious sustainability
goals with you in 2020!
